ABOUT ME

Currently enrolled at Hochschule Schmalkalden for Ms. Applied Computer Science and eligible for Werkstudent roles. Software Engineer with 3.5+ years of industry experience in full-stack development, specialising in Javascript, Java, Spring Boot, microservices architecture, and RESTful APIs. Delivered production-grade systems for enterprise telecommunications and logistics platforms, with measurable improvements in performance, scalability, and system reliability. Experienced in secure API design, database optimisation, and cloud-ready deployments using Docker and CI/CD pipelines.

WORK EXPERIENCE

🏢 **Pelatro Solution Pvt.Ltd.** – Bangalore, India

Software Developer

[01/08/2022 – 26/07/2025]

- Architected and maintained scalable microservices using Java 11, Spring Boot, and PostgreSQL for telecom platforms serving 5M+ subscribers.
- Reduced API response time from ~800ms to ~150ms by introducing Redis distributed caching and eliminating N+1 query patterns in JPA.
- Built high-availability REST APIs integrated with 6+ third-party external systems, cutting integration failure points by 30%.
- Implemented OAuth2 + JWT authentication with role-based access control and audit logging for secure multi-tenant access.
- Containerised services with Docker and automated deployments via Jenkins CI/CD pipelines, reducing release cycle time by ~25%.
- Developed real-time analytics dashboards using Angular 12 and HighCharts.js, visualising KPIs for telecom operations teams.
- Led production incident resolution and mentored 2 junior engineers in backend and frontend best practices.
- **Tech:** Java 11, Spring Boot, PostgreSQL, Redis, JPA, REST APIs, OAuth2, JWT, Docker, Jenkins, CI/CD, Angular 12, HighCharts.js, AWS (EC2, S3, Lambda)

Key Projects at Pelatro:

- **Real-Time Telecommunications Analytics Platform** — Designed a cloud-ready analytics system supporting real-time monitoring for millions of users. Built distributed caching layers for high-concurrency data access and developed interactive KPI dashboards for operations teams.
- **Microservices Migration Initiative** — Led decomposition of a legacy monolithic application into independently deployable microservices. Containerised services with Docker and established automated deployment workflows using Jenkins and GitHub Actions on AWS.
- **Secure Authentication Framework** — Designed and implemented OAuth2 + JWT-based authentication with role-based access control (RBAC) and audit logging, securing access across a multi-service backend environment.

🏢 **UNISYS Global Services** – Bangalore, India

Associate Application Developer Engineer

[18/10/2021 – 20/06/2022]

- Developed and maintained enterprise logistics and cargo revenue accounting modules in Java/Spring Boot handling high-volume financial transactions.
- Reduced production issue resolution time by ~25% through systematic log analysis using Linux tools and SQL profiling.
- Contributed to CI/CD improvements in Jenkins, reducing deployment friction for the team.
- Built REST API endpoints and backend modules under mentorship; contributed to bug fixes and unit testing with JUnit.
- Analysed production issues and supported debugging of Java-based enterprise applications for banking/IT clients.
- **Tech:** Java, Spring Boot, SQL, Oracle, Stored Procedures, JUnit, Jenkins, CI/CD, Linux, Log Analysis, REST APIs

EDUCATION AND TRAINING

MS Applied Computer Science

Hochschule Schmalkalden [10/2025 – Current]

City: Schmalkalden | Country: Germany

Bachelor of Engineering (BE)

Visvesvaraya Technological University (KNS Institute of Technology) [09/2017 – 06/2021]

Country: India | Field(s) of study: Computer Science and Engineering | Final grade: 7.82

Senior Secondary (XII)

Higher Secondary Education Board (Hetauda School of Management & Social Science) [2014 – 2016]

City: Hetauda | Country: Nepal | Website: <https://hsm.edu.np>

PROJECTS

[15/02/2026 – Current]

HSM Developer Hub — Community & Events Platform (Ongoing) Open-Source Contributor | Hochschule Schmalkalden

- Currently contributing to a full-stack community platform for Hochschule Schmalkalden students, supporting event registration, post creation, commenting, and community engagement features.
- Building frontend components in React, TypeScript and Tailwind CSS, following a component-driven architecture.
- Integrated Supabase for real-time database access, authentication, and storage, with Prisma ORM managing schema and database migrations.
- Collaborating via Git with structured commits, contributing to feature development, bug fixes, and UI improvements.
- **Tech:** React, TypeScript, Vite, Tailwind CSS, shadcn/ui, Supabase, Prisma, PostgreSQL, Git

Link: <https://github.com/anikit013/hsm-developer-hub>

[03/02/2021 – 15/05/2021]

Air Quality Index Prediction | KNSIT Bangalore

- Built and compared multiple regression models (Linear Regression, Random Forest, Ridge/Lasso, XGBoost) to predict Air Quality Index values from environmental sensor data. Developed a web scraper in Python to collect real-world data, performed feature analysis and model evaluation across all approaches, and deployed the best-performing model with a frontend interface via Heroku.
- **Tech:** Python, Jupyter Notebook, Scikit-learn, Linear Regression, Random Forest, Ridge/Lasso Regression, Web Scraping, HTML, CSS, JavaScript

Link: <https://github.com/anikit013/Air-Quality-Index-Machine-Learning>

INTERNSHIP

[02/04/2021 – 01/09/2021]

Internship Trainee QSpiders

- Completed a structured full-stack development training programme with hands-on project work. Built end-to-end web applications using Java, SQL, HTML, CSS, and JavaScript.
- Designed normalised database schemas and implemented CRUD operations.
- Developed foundational skills in backend logic, relational databases, and frontend integration that directly prepared for industry roles.
- **Tech:** Java, SQL, HTML5, CSS3, JavaScript, Database Schema Design, CRUD Operations

SKILLS

Hard Skills

- **Languages:** Java, TypeScript, JavaScript, Python, SQL
- **Backend:** Spring Boot, Node.js, REST APIs, Microservices, OAuth2, JWT
- **Frontend:** React, Angular, TypeScript, Tailwind CSS, HTML5, CSS3
- **Databases:** PostgreSQL, Oracle, Redis
- **Cloud/DevOps:** Docker, Jenkins, GitHub, AWS (EC2, S3, Lambda)
- **Security:** OWASP, OAuth2, JWT, Secure API Development
- **Testing:** JUnit, Unit Testing
- **Tools:** Git, Linux, IntelliJ IDEA, VS Code
- **Methodologies:** Agile, Scrum, CI/CD, Code Review

LANGUAGE SKILLS

Mother tongue - Nepalese

Other Languages

- English (B2)
- Hindi (C1)
- German (A2 — actively learning)
