Portfolio

Software Engineer with 3+ years of professional experience building and supporting Java/Spring Boot applications, microservices and REST APIs for telecom and enterprise systems. Experienced in performance optimisation, system integrations, secure authentication, production support and CI/CD. Currently pursuing an M.Sc. in Applied Computer Science at Hochschule Schmalkalden. Available for 20 hours per week.

Experience

Pelatro Solution Pvt. Ltd. Aug 2022 – Jul 2025
Software Developer | Bangalore, India

- Developed and maintained Java 11/Spring Boot microservices for telecom platforms serving more than 5 million subscribers, with a focus on reliability and performance.
- Reduced API response times from about 800 ms to 150 ms by introducing Redis caching and optimising JPA queries.
- Built REST API integrations with 6+ external systems, improving reliability and reducing integration failure points by 30%.
- Implemented OAuth2/JWT authentication, role-based access and audit logging for a multi-tenant environment.
- Improved Docker-based deployments and CI/CD workflows using Jenkins and GitHub Actions, reducing release-cycle time by about 25%.
- Developed real-time analytics dashboards, supported production incidents and mentored two junior engineers across backend and frontend development.

Unisys Global Services Oct 2021 – Jun 2022
Associate Application Developer Engineer | Bangalore, India

- Developed and supported Java/Spring Boot components for logistics and cargo revenue-accounting applications handling high-volume financial transactions.
- Helped reduce production issue resolution time by around 25% through log analysis, SQL debugging and performance profiling.
- Contributed REST endpoints, Oracle/SQL debugging, stored procedures, JUnit tests and Jenkins CI/CD improvements for enterprise applications.

Education

Hochschule Schmalkalden Oct 2025 – Present
M.Sc. Applied Computer Science Schmalkalden, Germany

Visvesvaraya Technological University Sep 2017 – Jun 2021
B.E. Computer Science and Engineering India

- KNS Institute of Technology; final grade: 7.82.

Selected projects

HSM Developer Hub – Community & Events Platform Feb 2026 – Present
Contributing to a university community platform with event registration, posts and comments. Developing responsive components and working on authentication, database access and schema migrations. Stack: React, TypeScript, Vite, Tailwind CSS, Supabase, Prisma and PostgreSQL. GitHub.

Air Quality Index Prediction Feb – May 2021
Compared Linear Regression, Random Forest, Ridge/Lasso and XGBoost models for AQI prediction using environmental data. Built a Python scraper and deployed a simple web interface. Stack: Python, scikit-learn, XGBoost, HTML/CSS/JavaScript. GitHub.

Technical skills

Programming: Java, TypeScript, JavaScript, Python, SQL

Backend: Spring Boot, Node.js, REST APIs, microservices, OAuth2, JWT

Frontend: React, Angular, Tailwind CSS, HTML5, CSS3

Databases: PostgreSQL, Oracle, Redis

Cloud & DevOps: Docker, Jenkins, GitHub Actions, AWS, CI/CD

Security & testing: OWASP, secure API development, JUnit, unit testing

Tools & methods: Git, Linux, IntelliJ IDEA, VS Code, Agile, Scrum, code review

AI-assisted tools: Cursor, ChatGPT, Claude, Gemini

AI Generative AI: Prompt Engineering, AI Agents, MCP, AI-Assisted Development

Languages

- Nepali – native
- English – C1
- Hindi – C1
- German – A2 (actively learning)

Training

QSpiders – Full-Stack Development Training
Apr 2021 – Sep 2021. Practical training in Java, SQL, HTML, CSS, JavaScript, relational database design and CRUD operations.
